

Are you excited about the opportunity to connect scientists around the world through metabolomics? If you strive to make a difference in our perception of diseases and want to shape the future of health, we should talk.

To strengthen our production team in Innsbruck, we want you to join us at the next possible date in a full-time position as:

## Head of (LC-MS/MS) Production and Quality Control

### Your role as team lead of our production and quality control lab team

- Manage production and quality assurance department and supervise all processes in our analytical lab
- Develop and establish production processes for new kit reagents, in cooperation with product development and QMS teams
- Monitor production and storage capacities in the lab
- Develop and create quality relevant documents (e.g. analytical and process instructions, SOPs), identify potential to improve and manage quality
- Drive and adapt LC-MS/MS assays for production and control of the processes
- Proactively develop ideas to improve the production department (e.g. robotics and automation)

### Your profile

- PhD in chemistry/biochemistry/biology or other direction with at least five years of suitable work experience
- Experience in team leadership is desirable
- Very good knowledge/experience in the field of (U)HPLC and mass spectrometry (especially LC-MS/MS)
- Experience in production and/or quality control is a prerequisite, in the area of production of research-use-only and medical devices is an advantage
- Experience in sample preparation of biological samples (e.g. blood) advantageous
- Very good computer skills are essential and enthusiasm for working with complex Excel templates and Access databases as well as elementary programming skills are desired
- Interest in modern laboratory automation/robotics
- High degree of quality awareness and interest in complex manufacturing processes
- Willingness to take responsibility and to shape and question
- Very good knowledge of German and English as you are working in an international as well as interdisciplinary team

### Our offer for you

- Collaboration and growth in a dynamic team with the global market leader in metabolomics
- Meaningful work where your ideas and contribution matter
- Attractive remuneration topped up with comprehensive social benefits
- Continuous learning and personal growth procedures
- Cutting-edge technical equipment
- Welcoming working atmosphere with an open-door policy
- Modern research facility with various social benefits in the pleasant city of Innsbruck with a great connection to public transportation

### About biocrates life sciences ag

biocrates, headquartered in Innsbruck, Austria, is a global leader in the growing field of targeted metabolomics. Our mission is to make metabolomics accessible to facilitate breakthroughs in biomedical research. With our pioneering phenotyping products and services, we help scientists and researchers gather new insights about disease prevention and personalized health. Our standardized, hypothesis-driven and quantitative approaches make biocrates' products ideally suited for high-throughput applications in epidemiology and clinical biomarker research and many other fields. Not only are our metabolomics kits in use in laboratories worldwide, we also operate a contract-research laboratory in our headquarters, serving both academic and commercial partners from around the world. For more information visit us on our website, [biocrates.com](https://www.biocrates.com), or follow us on LinkedIn.

Interested? Join us now! Apply by this [link](#) or send us your application to [career@biocrates.com](mailto:career@biocrates.com). To meet Austrian legal requirements, the job offer has to include the absolute minimum gross salary according to the collective agreement which is € 55.000,00 per year. The actual salary will most likely be higher and will be negotiated based on the candidate's qualification and experience.
