

Do you want to aid scientists from around the world with their fight against diseases? Would you like to participate making personalized medicine accessible for everyone? You strive to make a difference in the perception of diseases and want to shape the future of health? Then contact us.

We want you to join our team in Innsbruck at the next possible date in a full-time position as

Java Software Engineer (w/m/d)

What you will do

As a full-stack developer you will contribute to the entire lifecycle of our software products. Our software solutions not only guide scientists through the workflow of our kit products, but also offer tools required to extract novel insights from raw datasets. You will work with newest technologies, including a cloud environment, with the vision to enable scientific breakthroughs.

Who we are looking for

- You are proficient in object-oriented software development with Java
- Ideally, you already have experience with Spring and React
- You are excited about working with newest technologies
- Very good knowledge of English is essential since you will join an international team
- German is a plus

What we offer

- Meaningful work where your ideas and contributions matter
- Work-life balance due to flexible working hours and the option to enjoy the benefits of hybrid working models
- Welcoming working atmosphere with an open-door policy
- Modern research facility with various social benefits in the pleasant city of Innsbruck

Who we are

biocrates, headquartered in Innsbruck, Austria, is a biotech company in the growing field of targeted metabolomics. Our mission is to make metabolomics accessible to facilitate breakthroughs in biomedical research. With our phenotyping products and services, we help scientists and researchers gather new insights about disease prevention and personalized health. Not only are our metabolomics kits in use in laboratories worldwide, but we also operate a contract-research laboratory in our headquarters, serving both academic and commercial partners from around the world. For more information visit us on our website, [biocrates.com](https://www.biocrates.com), or follow us on [LinkedIn](#).

How to apply

Interested? Join us now! Apply [online](#) or send your application to career@biocrates.com.

To meet Austrian legal requirements, the job offer has to include the absolute minimum gross salary according to the collective agreement. The minimum salary for this position is € 40.000,00 per year gross (full-time, 14 x per year). Of course, we offer an overpayment in line with the market, depending on your qualifications and experience, as well as additional participation in our performance-related bonus system.
