

At biocrates, our mission is to make metabolomics accessible to facilitate breakthroughs in biomedical research. With our pioneering phenotyping products and services, we are changing the way health is measured. We help scientists and researchers gather new insights about disease prevention, laying the foundations for modern personalized medicine.

If that excites you as much as it excites us, consider joining our team.

To strengthen our team in Innsbruck, we are looking for a part-time 10 h/week starting in June 2022 (at least 6 month)

Student for Scientific Event Marketing (w/m/d)

What you'll be doing

- Coordination of a major scientific event in October 2022
- Communicate with event speakers, sponsors, service providers, and registrants/ attendees before the actual event and answer their questions or coordinate their actions
- Regularly report on the status of parallel activities taking place during preparation
- Contribute ideas and actions to promote the event and engage the audience
- To be able to take this position it is mandatory to agree that during September and October 2022 no holidays will be possible.

Does this sound like you?

- BSc or MSc degree in biology, biochemistry, medicine or related sciences
- Highly structured workstyle
- Fluent English is a must
- Proactive communication skills
- High degree of confidence and self-reliance (willing to take decisions and responsibilities)
- High motivation, result and customer orientation, efficiency and precision
- Enjoy working in an interdisciplinary team
- Temporally flexibility on agreement

Our offer to you

- A varied and fulfilling job in a high-performing, friendly international team
- Attractive salary package and comprehensive social benefits
- Continuous growth, professionally and personally, through further training opportunities
- Good public transport connections and relaxed parking situation
- The salary for this position is EUR 440,00 gross per month (10 hours/week).
