4th Annual MANA Conference

September 16-18th, 2022, Edmonton, Canada

Join us for lunchtime seminar in which Dr. Katherine Black discusses how to unravel the complexity of disease with the broadest combination of lipids and metabolites with our NEW MxP® Quant 500 XL kit.

Date and time: Friday, September 16th, 2022, 12:15-1:00 pm

Location: Maple Leaf Room, Lister Conference Centre

Pan-cohort studies – The future of population health

October 12th, 2022

The scientific program is now available online! With more than 40 speakers from around the world speaking in person and remotely, you won't want to miss this unique, connecting event about multi-omics, omics technology, large cohort studies, precision medicine, and biobanking.

MxP® Quant 500 kit validation for SCIEX 7500 system

Advancement of biocrates metabolic platform

biocrates' MxP® Quant 500, the comprehensive metabolomics kit for standardized metabolite quantification, is now validated for use on the SCIEX 7500 LC-MS/MS system. Find out more about performance and possibilities of this powerful combination.

Metabolite of the month

NAD+

In this section, our scientists highlight one specific metabolite each month. Topics of discussion include the biosynthesis and degradation in a broader health context, and the effect of dysregulation. In this month's article, we took a closer look at nicotinamide adenine dinucleotide or NAD+.
