## Virtual event

### Metabolomics in biomarker discovery and functional genomics using the MxP® Quant 500 XL kit

Join us for a virtual event on January 26, 2023, 05:00 pm CET (11:00 am EST). Dr. Giuseppe Astarita, Senior Director for biomarker discovery at Arkuda Therapeutics and Dr. Therese Koal, CTO at biocrates will focus on how metabolomics and lipidomics support drug development and why it is so crucial to work with quantitative data in biomarker discovery.

## Virtual event

### The STORY principle

#### A 5-step guide to the biological interpretation of metabolomics

If you want to learn more about strategies to plan and execute your data interpretation projects, register for this webinar on the STORY principle with Dr. Alice Limonciel on February 14, 2023, 04:00 pm EST (10:00 am CST)

## Metabolite of the month

### Phosphatidylethanolamines

In this section, our scientists look at one specific metabolite each month. Topics of discussion include the biosynthesis and degradation in a broader health context, and the effect of dysregulation. In this month's article, they took a closer look at Phosphatidylethanolamines.

## Pan-cohort studies - the future of population health

### Abstract book

The intention of this symposium was to inspire innovative research ideas and create new opportunities to collaborate. The abstract book of the event facilitates the overview and includes the links to the recordings of the talks, in case you missed them, want to re-watch or share.
