Certified lab program

Welcome to the family

We are excited to welcome new members to our certified laboratory program. **LODIAG**, France; **University of Alberta** TMIC Wishart Node, Canada; **University of Minnesota** and **Roswell Park**, New York joined the program recently. Are you experienced using metabolomics in your laboratory or interested in making metabolomics accessible to your partners and customers? Click the link below to learn about becoming a certified lab partner of biocrates!

MetaboINDICATOR™ - Now available for all kits

Translate metabolomics into knowledge

After careful development and extensive curation, the sum & ratio tool MetaboINDICATOR™ has been expanded and is now available for ALL biocrates kit products. MetaboINDICATOR™ is a tool that helps scientists better understand metabolic pathways and biological context to facilitate easier data interpretation in metabolomics.

Metabolite of the month

Histamine

In this section, our scientists look at one specific metabolite each month. Topics of discussion include the biosynthesis and degradation in a broader health context, and the effect of dysregulation. In this month's article, they took a closer look at Histamine.

The Metabolomist podcast

New podcast season

The **Metabolomist podcast** begins its 2nd season on April 18th, 2023. Alice Limonciel will be back, talking with leading metabolomics scientists, telling their stories, and discussing their research. Please sign-up below to be notified when the latest podcast is available.
