- Metabolite of the month | TMAO
- The Metabolomist podcast | Season 3

## Quantify the impact | Microbiome

Virtual event | April 16, 2024, 04:00 pm CET (09:00 am CST)

Exploring Metabolomics and Microbiome!  
Join Makala Moore from UNC Chapel Hill, Silvio Waschina from Kiel University, and Alice Limonciel from biocrates to understand how microorganisms influence health and disease in our virtual event on April 16, 2024!

## MxP® Quant 500 XL kit on SCIEX Triple Quad 7500

Platform extension

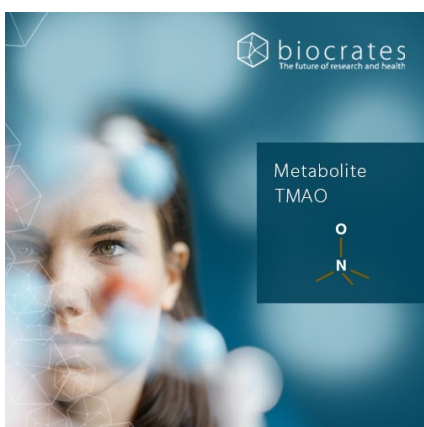

biocrates continues to expand instrument compatibility with the adaptation of the MxP® Quant 500 XL kit for SCIEX 7500 triple quadrupoles. The results demonstrated solid reproducibility across kit plates and sample types as well as correlating well with other supported platforms.

## Metabolite of the month

TMAO

In this section, our scientists look at one specific metabolite each month.

Topics of discussion include the biosynthesis and degradation in a broader health context, and the effect of dysregulation. In this month's article, they take a closer look at TMAO.

## The Metabolomist podcast

Season 3

The Metabolomist podcast is back for its 3rd season! Join Alice Limonciel as she kicks off with Robert Nagourney to discuss the benefits of prioritizing phenotype over genotype in cancer research. Together, they'll delve into how metabolomics enhances personalized medicine and analyze survival predictions. Tune in for insightful discussions!
