biocrates metabolomics technology

Now available for Thermo triple quadrupole platforms

We are thrilled to announce that MxP Quant 500 and MxP Quant 500 XL kits are now available for Thermo TSQ Altis and Altis Plus mass spectrometers. Maximize robustness and sensitivity by combining biocrates' quantitative and ready-to-use kit solutions with the TSQ Altis family from Thermo.

MxP Quant 500 kit automated sample preparation

Now with Andrew+ Pipetting Robot

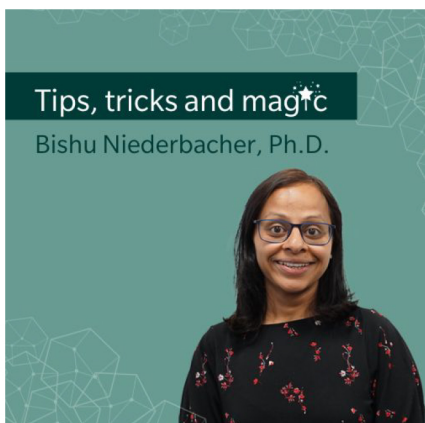

If you want to enhance throughput, reduce personnel time, and improve reproducibility for your metabolomics studies, high-throughput metabolomic profiling with the biocrates MxP® Quant 500 kit can now be efficiently automated using the Waters Andrew+ pipetting robot.

WebIDQ –Tips, tricks and magic

New on the biocrates YouTube channel

WebIDQ wizard Bishu Niederbacher, application support scientist at biocrates, shares the spells she casts to make WebIDQ operation feel like magic. Discover mystical tricks for importing plate runs in the LIMS monitoring tool and the sorcery of LC integration in WebIDQ's Quantification module. Don't miss out on these enchanting tutorials designed to enhance your WebIDQ experience!

Metabolite of the month

Deoxycholic acid

In this section, our scientists look at one specific metabolite each month.

Topics of discussion include its implication in various aspect of neurological and cardiovascular health and function. In this month's article, they take a closer look at Deoxycholic acid.

Metabolomics 2024

Conference overview and insights

Explore firsthand insights from the biocrates team at Metabolomics 2024 in Osaka, Japan. The conference fostered connections within the metabolomics community, highlighted biocrates' dedication to high-quality data and standardization, and infused joy through engaging interactions and activities.
