

## biovis and biocrates join forces to revolutionize consumer metabolomics

Limburg a.d. Lahn, Innsbruck, 05.02.2025 – biovis, a leader in innovative clinical diagnostics, and biocrates, a global pioneer in metabolomics, announce their collaboration aimed at bringing advanced metabolomics solutions into routine testing. This partnership marks a pivotal step in making personalized health insights accessible to everyone, empowering individuals to take proactive control of their well-being.

Metabolomics, the study of small molecules within biological systems, has traditionally been limited to research and clinical settings. With this partnership, biovis and biocrates are bridging the gap between cutting-edge science and consumer health by introducing innovative solutions that translate complex metabolic data into actionable insights for everyday life.

### A shared vision for health empowerment

By combining biovis expertise in diagnostics and laboratory services with biocrates' renowned metabolomics technology, the collaboration aims to market easy-to-use, reliable, and affordable tools for personalized health monitoring. This initiative will provide individuals with detailed metabolic profiles, enabling them to understand their unique biochemical makeup and make informed decisions about nutrition, lifestyle, and disease prevention.

### Prevent360 – Unique combination of standard markers and specific biomarkers

**Accessible Testing Solution:** Rapid and accurate testing of 75 parameters related to health and well-being.

**Actionable Insights:** Delivering user-friendly reports that offer tailored recommendations for diet, exercise and overall wellness.

**Education and Support:** Offering resources to help users understand their metabolic data and implement meaningful changes.

**Scientific Rigor:** Ensuring all solutions are backed by robust scientific validation, adhering to the highest standards in accuracy, and interpretation.

Dr. med. univ. Vilmos Fux, doctor for laboratory medicine at biovis, stated: "This collaboration aligns perfectly with our mission to advance healthcare through innovative diagnostics. By partnering with biocrates, we're making metabolomic insights accessible to everyone, empowering individuals to optimize health outcomes." Dr. Sebastian Gottfried, CMO of biocrates, added: "For years, metabolomics has been a tool for researchers and clinicians. Together with biovis we are democratizing this powerful technology, transforming it into a resource that anyone can use to improve their health and quality of life."

### Looking ahead

With the Prevent360, biovis and biocrates are committed to reshaping the landscape of personalized health by delivering the most comprehensive and actionable metabolic insights to consumers in Europe.

### About biovis Diagnostik MVZ GmbH

Innovation. Research. Passion. As one of the most innovative human medical diagnostic laboratories in Europe, biovis Diagnostik GmbH offers nearly a thousand different laboratory analyses and tests in the fields of metabolic and metabolome diagnostics, molecular genetics, standard clinical diagnostics, microbiology, immunology, and preventive medicine. In addition to pure laboratory diagnostics, the services also include individualized therapy recommendations, which offer a benefit to both patients and medical professionals. Own research under the direction of Prof. Dr. med. Burkhard Schütz and close cooperation with renowned research groups in Germany and abroad enables the lab to continuously expand and improve its range of laboratory analyses and tests.

### About biocrates life sciences AG

biocrates is the world's leading company in quantitative metabolomics, delivering innovative technologies and solutions for research and clinical applications. With a mission to advance metabolic research and its applications, biocrates empowers scientists and clinicians to unlock the secrets of metabolism.
