

AbsoluteIDQ[®] p400 HR kit

Quantitative lipidomics and metabolomics solution
in a high resolution workflow

biocrates.com

Mass spectrometry-based metabolomics kits

Ready-to-use

Automated
workflow

Standardized,
quantitative

High
throughput

For research use only | not for use in diagnostic procedures

AbsoluteIDQ® p400 HR kit

The AbsoluteIDQ® p400 HR kit offers a high-resolution workflow for clinical and epidemiological research.

High resolution and high coverage

- Broad quantitative metabolic profiling with Thermo Orbitrap mass spectrometers
- 531 biomarkers covering key metabolic pathways

Global user network

- Inter-lab reproducibility proven by international ring trial
- Available in dozens of laboratories across the globe

Coverage

- 408 metabolites from 11 compound classes, 123 metabolism indicators

Sample volume | type

- 10 µl | For use with various sample matrices and species

Throughput

- 320 samples/week/instrument

Kit components

- Patented 96-well filter plate with integrated internal standards
- Calibration and QC samples, system suitability test samples
- Protocols for different matrices
- Instrument-specific methods for Thermo Q Exactive™ and Exploris™ mass spectrometers
